From: Annette Bell
Subject: Murrieta Water Study Comment

Message Body:

Western looks like it is in the middle for future costs for families. It is not the most expensive, but it is also not the least expensive going forward. So, keeping things the same does not result in any savings for residents, given all of the things that need to be done in the area. It looks like Eastern can get it done and does not financially harm the families in the process.
